EDUCATION

SRM Institute of Science and Technology <i>Bachelor of Technology in Computer Science and Business Systems</i> – CGPA: 8.3/10.0	Vadapalani, Chennai 2021 – 2025
Velammal Vidhyashram <i>12th Grade – 78%</i>	Surapet (CBSE) 2020
Velammal Vidhyashram <i>10th Grade – 72%</i>	Surapet (CBSE) 2018

EXPERIENCE

Program Tester (Gen AI Intern) <i>Evolve Robot Lab</i> – Developed and fine-tuned a Generative AI model for high-accuracy text summarization tasks. – Implemented and evaluated machine learning classification models using Python and Scikit-learn. – Gained hands-on experience in full ML lifecycle including data preprocessing, training, and evaluation.	April 2025 – May 2025 Chennai, TN
Support Intern <i>CPCL (Chennai Petroleum Corporation Limited)</i> – Maintained critical IT infrastructure and monitored refinery systems to ensure system uptime. – Resolved hardware and network issues and documented system workflows with technical team.	August 2025 – September 2025 Chennai, TN

PROJECTS

RESTful User Management System <i>Java, Spring Boot, Spring Web, MySQL, JPA, Swagger UI, MVC, REST API</i> – Developed a Spring Boot web application for user data management featuring robust RESTful APIs for CRUD. – Designed a detailed ER Diagram to map user relationships and implemented the MVC Architecture for logic. – Integrated Spring Data JPA for persistence with a MySQL database, handling complex nested JSON structures. – Automated API documentation using Swagger UI, enabling real-time endpoint testing and response validation. – Reduced boilerplate code by utilizing Lombok and implemented password-based login validation logic.
Employee Management System <i>Java, Spring Boot, Spring Data JPA, Hibernate, MySQL</i> – Engineered a backend system using Spring Boot for scalable management of employee profiles and payroll data. – Drafted normalized ER Diagrams and established complex entity relationships using MVC Architecture principles. – Optimized data retrieval efficiency using custom JPQL and Native SQL queries for effective reporting. – Developed a comprehensive set of RESTful endpoints for seamless entity management and data tracking. – Utilized automated build tools for dependency management and leveraged Spring Tool Suite for code maintenance.

TECHNICAL SKILLS

Languages: Java, Python, SQL (MySQL), JavaScript, HTML5, CSS3
Frameworks: Spring, Spring Boot (Web, JPA, JDBC, Actuator)
Tools: Swagger UI, Postman, Spring Tool Suite, IntelliJ IDEA, VS Code, MySQL Workbench
Software Development: RESTful API Design, MVC Architecture, Database Normalization, ER Diagram Design
